

# Notice

## Gate Access

### Please Read Carefully before Exiting

**For the Security of the Airport and Your Aircraft**

**Pilots or Pedestrians disbarcking a plane coming from the apron to the parking lot will be able to access the gate and leave without having to enter a code to get to the parking lot. Pilots or Pedestrians leaving the parking lot to board an aircraft have to enter a code in the pedestrian gate lock in order to gain access to the apron area where the planes are parked.**

**The gate has a normal door handle and five vertical push buttons which are to be depressed to activate the un-lock code. To unlock the gate you press buttons 2 and 4 simultaneously and then release. You next push button 3 and release then pull down on the handle to open the gate. Since the gate is new the handle is stiff and you must firmly pull down on the handle until the gate opens.**

**Please call Public Safety's non-emergency phone number, 434-332-1058 Pilots or Pedestrian calling the above posted Public Safety non-emergency number may be given the access code to unlock the pedestrian gate as long as the pedestrian give the aircraft identification number know as the "N" number.**

**If you have any questions please call Larry Nash the Airport Manager at 434-238-5184 or 434-376-3381.**
